 Trichy

SUMMARY

Motivated Computer Science undergraduate with internship experience in Data Science, AI/ML, and Web Development. Skilled in Python, SQL, Machine Learning, Data Analysis, Database Management, and modern web technologies. Experienced in developing predictive models, analyzing complex datasets, and building responsive web applications using Python, Pandas, NumPy, Scikit-learn, HTML, CSS, JavaScript, PHP. A quick learner with strong analytical, problem-solving, and communication skills, seeking an entry-level Data Analyst, Data Scientist, or AI/ML role to create data-driven solutions and contribute to organizational success.

PROFESSIONAL EXPERIENCE

Data Science with AI

06/2025 – 08/2025

Intern

Coimbatore

- Developed **Weather Prediction** and **Spam Detection** projects using **Python, Pandas, NumPy, and Scikit-learn**.
- Performed data preprocessing, cleaning, exploratory data analysis (EDA), and feature engineering on structured datasets.
- Built, trained, and evaluated machine learning models to improve prediction accuracy and performance.
- Created data visualizations using Matplotlib to communicate insights and support decision-making.

AI&ML

06/2026 – 07/2026

Intern

Trichy

- Assisted in developing and evaluating machine learning models for AI-driven solutions.
- Performed data preprocessing, cleaning, feature engineering, and exploratory data analysis (EDA).
- Utilized Python, Pandas, NumPy, and Scikit-learn for predictive modeling and data analysis.
- Created data visualizations using Matplotlib to communicate analytical insights effectively.

PROJECTS

Student Connect – Academic Performance Tracker

Developed a full-stack web application using HTML, CSS, JavaScript, Node.js, and SQL to streamline academic management. Implemented features including attendance tracking, grade analysis, interactive dashboards, assignment management, and leave request workflows. Designed responsive user interfaces, integrated backend functionality with database operations, and enhanced application performance and user experience.

Smart HeartCare System Using ML

Developed a **Smart HeartCare System** using Machine Learning to predict the risk of heart disease based on patient health parameters. Performed data preprocessing, exploratory data analysis (EDA), feature engineering, and model training using Python, Pandas, NumPy, and Scikit-learn. Evaluated multiple classification algorithms to improve prediction accuracy and built an intuitive interface for users to input health data and receive real-time risk predictions, supporting early diagnosis and preventive healthcare.

EDUCATION

Master of Computer Applications (Generative AI) <i>SRM Institute of Science and Technology</i>	06/2026 – Present
B.Sc. Computer Science & Application <i>Sri Krishna Arts and Science College</i>	06/2023 – 04/2026

SKILLS

Programming Languages

- Python
- SQL
- C
- R Language

Tools

- Git
- GitHub
- VS Code
- Jupyter Notebook

Machine Learning

- Regression
- Classification
- Pandas
- Scikit-learn

Web Technologies

- HTML
- CSS
- JavaScript
- PHP
